

TEM: Spend Smarter, Tech Better

What is TEM?

TEM stands for “Telecom Expense Management” or “Technology Expense Management.” It gives businesses a way to understand their tech spend – how much they’re spending, what they’re spending it on, and how that spending could be more efficient.

BENEFITS OF TEM

INVENTORY MANAGEMENT

- **Complete inventory.** You can receive a full list of your IT products and services.
- **Stay up-to-date.** TEM services help you identify and upgrade obsolete products within your tech portfolio.

ENHANCED SECURITY

- **Mobile device management (MDM).** You can identify security weaknesses and prevent costly data loss.
- **Firewall strengthening.** TEM services will uncover inadequate or expired firewall solutions.

REDUCED COSTS

- **Eliminate unused services.** You can determine where resources have been over-allocated within your IT infrastructure.
- **Identify inefficiencies.** TEM disentangles your telecom and utilities bills, uncovering licensing issues and billing discrepancies that are costing your company.

Why TEM is Right for Your Business

TIME SAVING

Managing the intricacies of telecom billing and gaining a holistic view of your IT infrastructure can be time-consuming and non-comprehensive. TEM accelerates the process and lets you outsource the hard work of IT optimization.

CONVENIENT

Key metrics concerning your IT spend will appear in a portal provided by the TEM provider. We can help you integrate this portal with your existing analytics dashboard – maximizing convenience for your team.

RESULTS-ORIENTED

After assessing the data provided by a TEM service, we can assist with any changes you choose to make to your tech portfolio. The result will be a renovated IT infrastructure that costs less while doing more.

Let's get started!
